- **6DISS workshop in Malta**
  IPv6 Management Hands-on session

- Goals of the hands-on session

  Goals :
        Be able to get real time information on
        - links and network equipment status
        - IP services status

        additionnally, be able to troubleshoot the network or the equipment
        and anlayze IPv6 packet structure
- Tools to be installed by attendees

  list of possible tools to install

        - Ethereal
        - Ntop (or alternately Argus or Nagios)
        - AS Path Tree
        - Looking Glass
- where to retrieve the tool packages and install documentation ?

  All URLs can be retrieve from 6NET website at : http://tools.6net.org/moin/MonitoringToolsList

        - Ethereal
              http://www.ethereal.com/introduction.html
              should be already installed on the Malta lab PCs
              cf. IPv6 Basics hands-on doc

        - Ntop (or alternately Argus)
              http://www.ntop.org/overview.html (or http://sourceforge.net/project/showfiles.php?group_id=17233)
              http://argus.tcp4me.com/docs.html

        - AS Path Tree
              http://carmen.cselt.it/cgi-bin/download.pl?pkg=ASpath-tree

        - Looking Glass
              http://traceroute.org/#source%20code (Rancid, ...)
