

IPv6 network management

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

Contributions

- Simon Muyal, RENATER
- Bernard Tuy, RENATER
- Jérôme Durand, RENATER
- Ralf Wolter, Cisco
- Patrick Grossetête, Cisco
- Munechika Sumikawa, Hitachi
- Patrick Paul, 6WIND

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

Agenda

- Introduction
- Retrieving information from routers
 - TELNET/SSH/TFTP/FTP...
 - SNMP/MIBs and IPv6
 - Netflow
- Management platforms
- Management tools
 - 6NET work
 - Recommendations (LAN, WAN...)
 - Examples
- Conclusion & Demo

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

Introduction

- Network Management : What is it?
 1. Configurations
 2. Inventory
 3. Topology
 4. Fault
 5. Security
 6. Accounting

...

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

Introduction

- IPv6 networks deployed:
 - Most are dual stack
 - LANs (campuses, companies, ...)
 - MANs
 - WANs - ISPs (Géant, NRENs, IIJ, NTT/Verio, Abilene, ...)
 - IX's
 - Testbed, pilot networks, production networks
 - Management tools/procedures are needed
 - What applications are available for managing these networks ?
 - Equipment, configurations, ...
 - **IP services** (servers : DNS, FTP, HTTP, ...)

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

Introduction

- Different types of networks
 - Dual stack IPv6 & IPv4 networks
 - IPv6 only networks (few of them)
- Important to keep in mind
 - Dual stack is not for ever
 - One IP stack should be removed... one day
 - No reasons for network admins to face twice the amount of work

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

Dual Stack IP networks

- Part of the monitoring via IPv4
 - Connectivity to the equipment
 - Tools to manage it [inventory, configurations, «counters», routing info, ...]
- Remaining Part needs IPv6
 - MIBs IPv6 support
 - NetFlow [v9]

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

IPv6 only networks

- Topology discovery [LAN, WAN ?]
- IPv6 SNMP agent
- SNMP over IPv6 transport

=> Need to identify the missing parts

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

SSH/TELNET/TFTP...

Basic requirements to manage a network

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

SSH/TELNET/TFTP...

- All routers support IPv6 connections (SSH, TELNET)
 - Periodic scripts can retrieve information from the routers over IPv6
- TFTP/IPv6 as well supported on every equipment
 - Images can be downloaded over IPv6
- FTP/IPv6 not supported on CISCO routers

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

SNMP/MIBs and IPv6

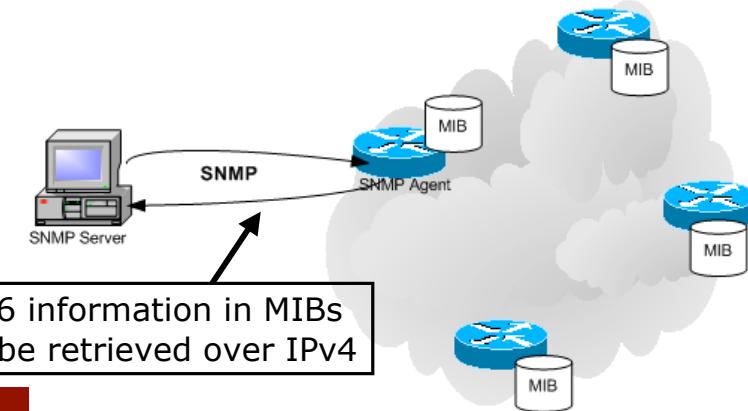

- SNMP and IPv6
- IPv6 MIBs status
- Manufacturers implementations

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

SNMP model

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

SNMP over IPv6

- Cisco:
 - SNMP over IPv6 is available in 12.0(27)S and 12.3(14)T
 - More features available from 12.0(30)S
- Juniper, Hitachi, 6wind:
 - SNMP over IPv6 is available

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

IPv6 MIBs Status

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

IPv6 MIBs status

- MIBs are essential for the network management
- SNMP-based applications are widely used but others exist too [NetFlow, XML...]
- SNMP rely upon MIBs ...
=>Need to have MIBs to collect IPv6 information as well as get MIBs reachable from an IPv6 address family.

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

IPv6 MIBs / 2

- Standardization status at IETF:
 - At the beginning:
 - IPv4 and IPv6 MIBs dissociated

	IPv4	IPv6	Remarks
Textual Conventions	RFC1902	RFC2465	Definition of IP address format
IP MIB	RFC2011		
ICMP MIB		RFC2466	
TCP MIB	RFC2012	RFC2452	
UDP MIB	RFC2013	RFC2454	

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

IPv6 MIBs /3 [Hidden]

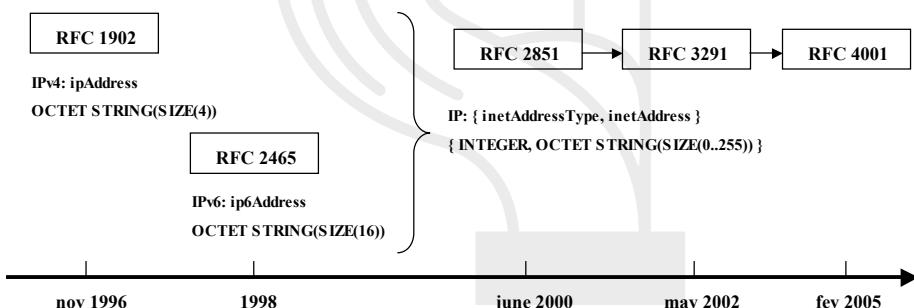

- Standardization status at IETF: Unified MIBs
 - Definition of new Textual Conventions (TC) taking into account both versions of IP:
 - **RFC2851:**
 - IP:{InetAddressType, InetAddress}
 - **RFC3291** [Obsoletes RFC2851]:
 - New TCs: InetAddressPrefixLength, InetPortNumber, InetAutonomousSystemNumber
 - **RFC4001** [Obsoletes RFC3291]:
 - New TCs: InetZoneIndex, InetScopeType, InetVersion

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

IPv6 MIBs /3

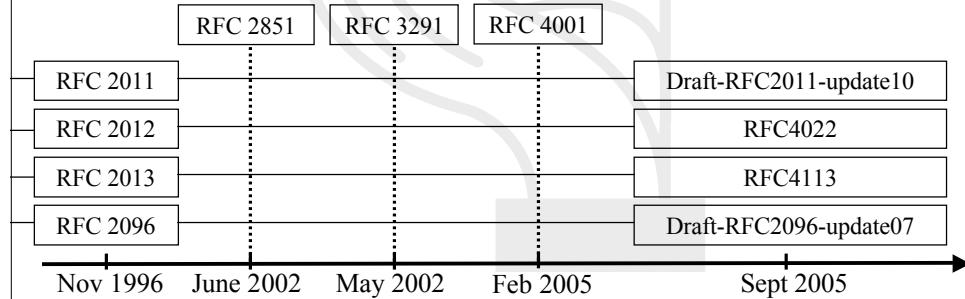

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

IPv6 MIBs / 4

■ Standardization status at IETF

- Today : **unified MIBs** are on standard track.

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

IETF MIB Status / 5

- draft-ietf-ipv6-rfc2011-update-10.txt
 - **IP MIB** [05/2004]
 - In the RFC Editor's queue [06/2004]
- **RFC4022**
 - **TCP MIB** [03/2005]
- **RFC4113**
 - **UDP MIB** [06/2005]
- draft-ietf-ipv6-rfc2096-update-07.txt
 - **IP Forwarding Table MIB** [02/2004]
 - proposed standard RFC
[in the RFC Editor's queue...]

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

IETF MIB Status / 6

- BGP MIB v6:
 - draft-ietf-idr-bgp4-mibv2-05.txt (07/2005)

Note that the same people are working on

- draft-ietf-idr-bgp4-mib-15.txt (08/2004)

• This draft consider only IPv4 addresses:

- «**IMPORTS IpAddress** » → 32 bits

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

IPv6 MIBs implementations

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

IPv6 MIBs implementation/1

- Cisco

- Private Cisco MIBs implement ID-OO of RFC 2011 & 2096 updated drafts
- Working on implementing the new standards
- No distinction between IPv4 and IPv6 traffic at the interface level from the MIBs (available when new IETF MIB get implemented)
- Information available from CLI
 - *show interface accounting*
 - ...

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

Cisco: IPv6 CLI

“show interface accounting”

- Differentiate IPv4/IPv6 counters at the interface level for all Cisco routers, except:
 - Catalyst 6500 / Cisco 7600 supervisor engine 720:
Counts only for packets that are software switched, not the hardware switched packets.
 - GSR:
 - ‘show interface counters’ correctly counts IPv6 traffic and separates ingress and egress traffic
 - Engine 3:
 - * OUTPUT IPv6 traffic is counted under IPv6 (correct)
 - * INPUT IPv6 traffic is counted under IP (will get corrected)

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

IPv6 MIBs implementation/2

- Juniper
 - MIB based on RFC 2465
 - with different counters for IPv4 and IPv6 traffic
 - Or based on filters to collect IPv6 traffic:
 - Ex: Geant monitoring

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

IPv6 MIBs implementation/3

- Hitachi
 - Routers [GR2000/GR4000] and Switches [GS4000] support IPv6 standard MIBs:
 - RFC 2452: TCP/IPv6
 - RFC 2454: UDP/IPv6
 - RFC 2465: IPv6
 - RFC 2466: ICMPv6
 - The unified MIBs are not implemented yet.

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

IPv6 MIBs implementation/4

- 6WIND
 - MIBs based on RFC 2465 and RFC 2466
 - Checked at our lab.

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

IPv6 MIBs implementation/5

- Net-SNMP (Carnegie Mellon Univ)
 - <http://net-snmp.sourceforge.net/>
 - RFC 2452: TCP/IPv6
 - RFC 2454: UDP/IPv6
 - RFC 2465: IPv6
 - RFC 2466: ICMPv6
 - RFC 3291: new textual convention for representing Internet Addresses

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

IPv6 flow monitoring

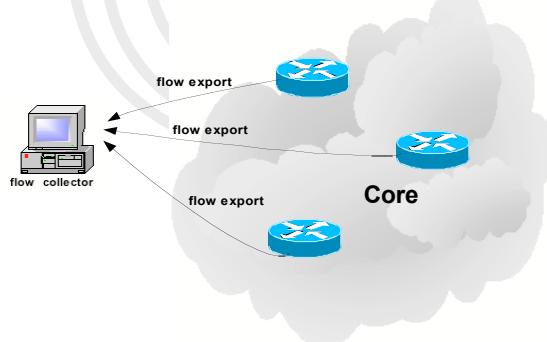

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

Netflow & IPFIX model

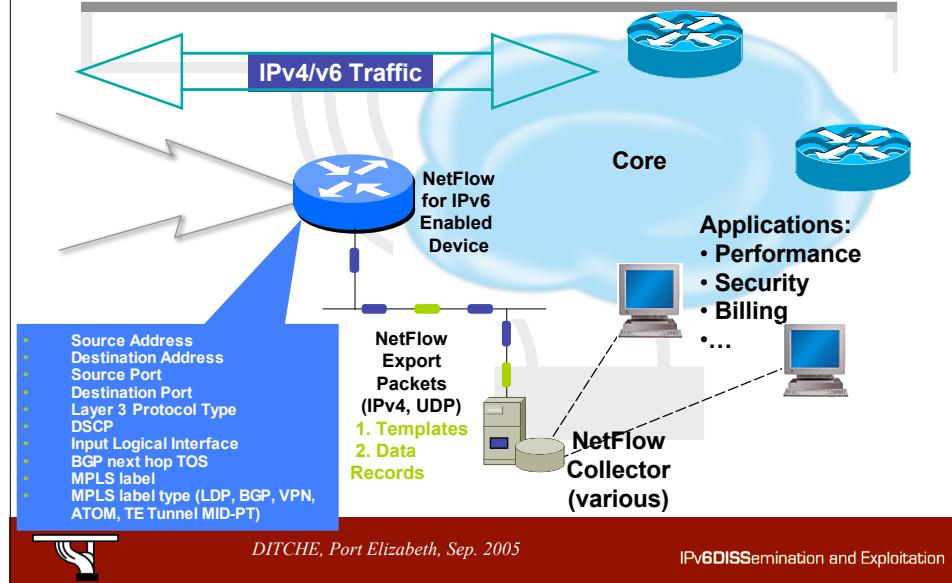

flow collector

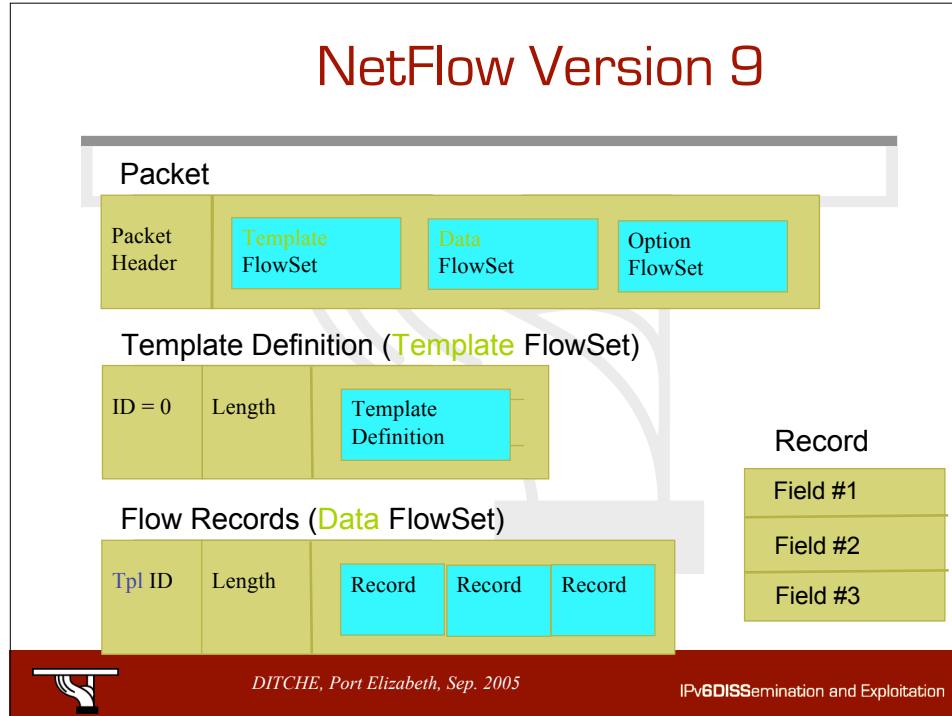

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

NetFlow for IPv6

NetFlow Version 9

NetFlow Version 9 Example for Template Definition

Template A	
Flow Set ID (0 for Template)	
Length of Template Structure	1001
(Template ID)	3
(# of Fields)	SRC_AS_NUMBER
	2
DST_AS_NUMBER	2
L4_PROTOCOL	2

Template B	
Flow Set ID (0 for Template)	1002
Length of Template Structure	(Template ID)
4	4
(# of Fields)	SRC_IP_PREFIX
	4
SRC_AS_NUMBER	SRC_AS_NUMBER
	2
PACKET_COUNT	2
BYTE_COUNT	2

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

Example for Export Packet

Packet Header	Template B	1.1.1.1 2.2.1.1		Template A	1001	35
		20	64			
		365	20			700
		92894	1000			23
				Record 1	Record 2	

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

IPv6 flow monitoring /1

- Cisco
 - Available in IOS 12.3(7)T and later version
 - IPv6 packets captured (needs IPv6 cef)
 - Export done with Netflow v9
 - Still uses IPv4 transport
 - Need to update your own Netflow Collector
 - Cisco NFC v5.0 available
 - Other collectors are available as well ...

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

IPv6 flow monitoring /2

- Hitachi
 - Support sflow (<http://www.sflow.org/>) and Netflow is on the roadmap.
- 6WIND:
 - Not available
- Juniper:
 - Not available

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

Commercial Management platforms

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

Commercial platforms

Commercial ISPs use to have integrated management platforms (NRENs mainly use GPL or home-made tools)

- **HP-OV** proposes a version with IPv6 features: NNM 7.0 (sept 2003). Need some hack for automatic IPv6 discovery of CISCO routers.
- **Ciscoworks**: IPv6 version for
 - Campus Manager under tests
 - Application note on IPv6 management
- **Tivoli Netview** doesn't propose any IPv6 features
- **Infovista** : « no IPv6 plan at the moment »

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

Cisco: NMS Application Support for IPv6

- Cisco NetFlow Collector (NFC) 5.0
 - Full support for IPv6 records
 - Note: device export still IPv4 only
- CiscoWorks
 - Campus - Functional test has started
 - RME -Functional test starts soon
 - CiscoView - under development
- Cisco Network Registrar (CNR):
 - Phase 1 (1H2005): Manage IOS DHCPv6 servers
 - Phase 2: Add DHCPv6 and DNS-over-IPv6

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

« Top ten » ...

- HP Openview
- Ciscoworks 2000 [Campus Manager]
- IBM Netview
- Infovista, Tivoli
- ...

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

Monitoring tools

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

6Net and IPv6 monitoring tools

- 6Net WP6 : managing large scale IPv6 networks
 - Tests lots of IPv6 ready tools
 - Many others ported to IPv6
- 30+ monitoring tools for IPv6
 - Tested
 - Implemented
 - Documented
- URL: <http://tools.6net.org/>

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

LAN - recommendations

- Traffic & service management [web, DNS, SMTP, IMAP...]
 - A single tool: [Argus](#), [Nagios](#) or [Ntop](#)
- End-to-end performance of the IPv6 network
 - [Iperf](#) or [Pchar](#)
- Configuration management
 - [Rancid](#)
- Analysis of packets on shared links for occasional troubleshooting
 - [Ethereal](#), [tcpdump](#) or [Ntop](#)
- IPv6 multicast management
 - [Multicast](#) [[D](#)]beacon

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

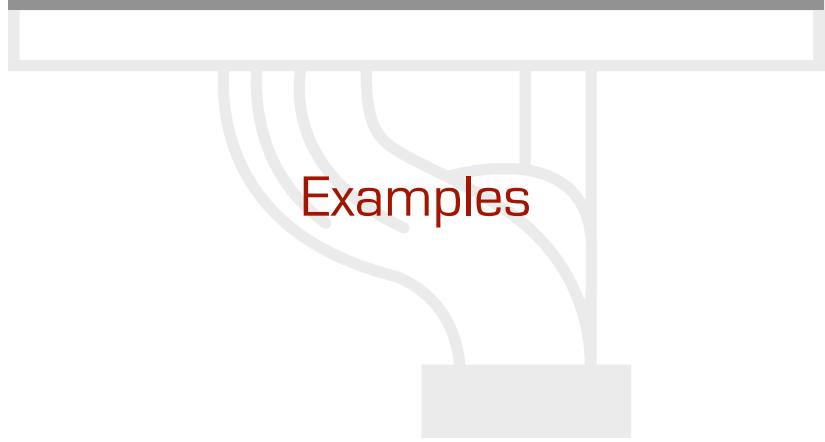

WAN - recommendations

- Traffic management
 - [MRTG](#), [Cricket](#) or [Nagios](#)
- Equipment and link status:
 - [Intermapper](#) or [Nagios](#)
- Routing management:
 - [ASpath-tree](#) (routing policy study)
 - [Home-made scripts](#) (routing fault management)
- For accounting management:
 - [Ipflow](#), [CISCO NFC v5.0](#) or [Home-made collectors](#)
- Configuration management:
 - [Rancid](#), [Home-made inventory tool](#)
- [Looking-glass](#) for customers

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

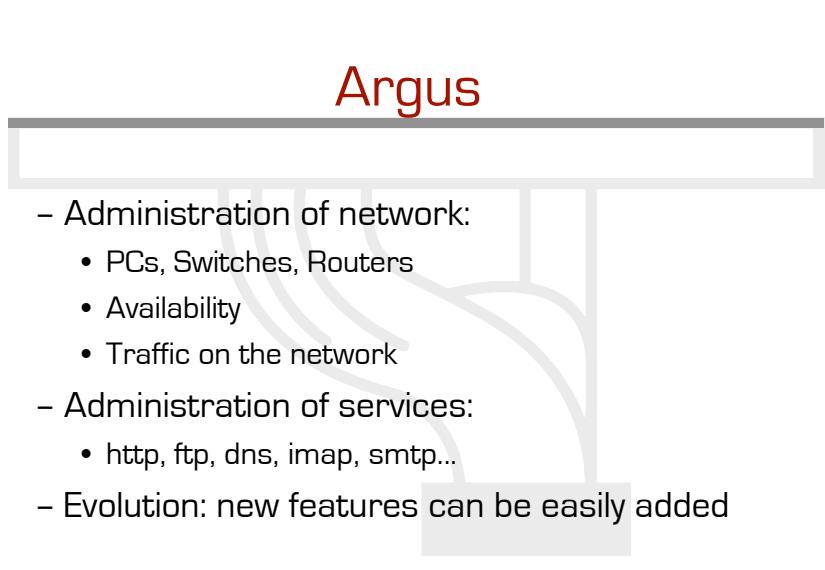

Examples

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

Argus

- Administration of network:
 - PCs, Switches, Routers
 - Availability
 - Traffic on the network
- Administration of services:
 - http, ftp, dns, imap, smtp...
- Evolution: new features can be easily added

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

IPv6 traffic on Cisco routers

- Based on CLI program
 - "show interface accounting"
 - Differentiate IPv4/IPv6 counters at the physical interface level
 - One query per hour
- IPv6 Weather Map of RENATER

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

IPv6 traffic on Cisco routers

DITCHE, Port Elizabeth, Sep. 2005

IPv6DISSemination and Exploitation

Conclusion

- ISPs –and any other organizations– need monitoring tools to launch a new service/protocol into production
- Most of management protocols are on standard track
- Lots of monitoring tools are now ready for IPv6 networks
- But :
 - Q1: are my usual tools (used for IPv4 monitoring) available for IPv6 too ?
 - Q2: what do I need to stress to my favourite vendor to be ready and manage my IPv6 network ?
